The End.....	83

Prologue

Why Magic Was Misdefined

This book is not about miracles.

It is not about bending physical laws.

It is not about spectacles, wonders, or religious theater.

What this book calls **Magic** is something much older, much simpler, and much more dangerous:

Magic is the world of the Magi.

It is what belongs to them.

What happens in their space.

How meaning is structured, how reality is cut, how axes are formed.

In different chapters, this has been called:

- the field
- the universe of meaning
- the world of the Magi

Here, it will be called by its real name: **Magic.**

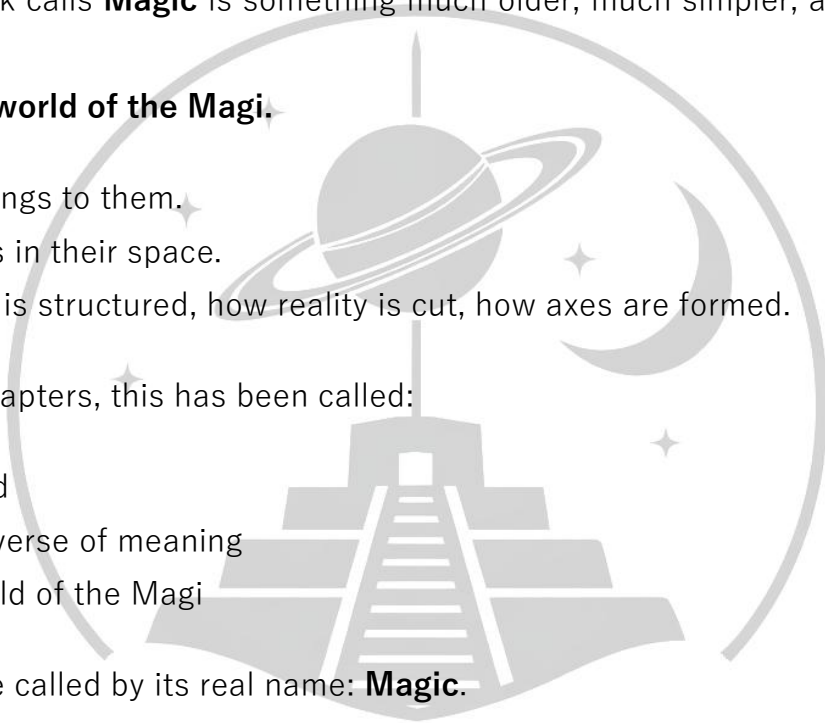

Not because this is a metaphor.

But because **this was always what “magic” meant** before it was amputated, distorted, and turned into a circus.

The modern reader has been trained to hear the word “magic” and immediately think of impossibilities:

sticks turning into dragons, seas splitting, fire not burning, corpses walking, physics being suspended for show.

This is not Magic. This is **what Magic was turned into.**

The ontology of Magic was never “miracle”.

It was **Magian**: what belongs to the Magi, what operates in their space, what structures their world.

After Magic was eliminated through what this book calls **axial amputation**, the Matrix did two things:

1. It **absurdized** Magic by redefining it as impossible violations of nature, belonging to a mythical past.
2. Then it used the denial of that same absurdity as proof that Magic is stupid and the Matrix is sober.

First, it broke your leg.

Then it mocked you for limping.

The word “Magian” is only a prosthesis.

They pulled out the real tooth—**Magic**—and put “Magian” in its place.

Something technical. Something dry. Something that no longer threatens anything.

This is not a modern operation. Because the Matrix is not modern.

In this book we will show that the Matrix, at minimum, was already operating in 522 BC—and very likely a millennium earlier elsewhere. The Old Testament is not the beginning of this distortion; it is only the **oldest record we still have** of it:

- Moses’ staff turning into a dragon
- Frogs raining from the sky
- The sea splitting in two
- Fire that does not burn

These are not descriptions of Magic.

They are **the earliest surviving products of its corruption**.

So why was Magic redefined this way?

There are two reasons.

The first is simple:

You look sober when you reject something absurd—**as long as no one notices that you created the absurdity first.**

It is like crushing a man in the street and then proving to the crowd how indecent he is for lying on the ground.

The second reason is more serious. It is a control technique.

Theorem:

If a religious tradition convinces people that great reformers “did magic” in the sense of absurd, impossible spectacles, then **no new reformer can ever appear.**

Because every new one will be asked to do the same nonsense.

And if he cannot, he will be rejected.

And very often, he will be killed.

This is exactly what happened again and again.

Judaism waits for Mashih for thousands of years and kills every real Mashih—because “magic,” in its corrupted sense, is impossible to perform.

Shi‘ism cries day and night for the appearance of Mahdi—and becomes the fiercest Mahdi-killer the moment someone appears—because Mahdi has been defined by **absurd magic.**

In this way, corrupted Magic becomes the **test.**

And once the test is wrong, it becomes the **perfect filter against reform.**

If priesthood and scripture succeed in establishing that “magic” means mind-boggling violations of physical law, then this becomes the criterion. And nothing prevents the formation of real axes more efficiently than a **false definition of Magic.**

This book is written to take that weapon away.

It does not defend miracles.

It does not argue for spectacles.

It does not try to revive superstition.

It restores a word to its original place.

Magic is not the violation of nature.

Magic is the structure of a world.

Magic is the space of the Magi.

That is why the Magi are called magicians.

Not because they perform tricks.

But because they inhabit and operate within **Magic**.

Anyone who opens this book expecting wonders will be disappointed.

Anyone who wants to understand **how meaning, power, and reality were reorganized** will find the subject they were actually looking for.

This is not a book about miracles.

This is a book about **Magic**.

The Ontic Family of Devil

Polytheism — A Declaration of Method

Let me start with a simple, brutal question.

Can you live in a line?

You are a three-dimensional body. Length, width, height. These three dimensions do not decorate you. They **make a space**. And only because there is a space can you live, move, breathe, act, collide, desire, fall.

Now imagine I amputate one dimension. Height is gone. You are forced into two dimensions. You become a shadow. A drawing. A moving image on a screen. You can still “move,” but only inside a flat prison.

Now imagine I amputate another. Width is gone. You are reduced to a line. You can still run forward and backward. Technically, there is still motion. But is this still life? Or is it already a parody of life?

And if I amputate half of that last dimension too—what remains is not even a line. It is a direction without space. A command without a world. A will without a body.

This is not a metaphor. This is the exact operation that has been performed on the Magian cosmos.

The Magi did not begin with “many gods.” They began with **space**. A three-axial ontic space. Three conditions of possibility that make any world, any being, any god, any city, any house, any family possible at all.

These three are not “gods.” They are **axes**.

Axes are not occupants of space. Axes **generate** space.

When you have axes, you can have multiplicity. You can have families, pantheons, hierarchies, conflicts, stories. You can have what later people, very clumsily, call “polytheism.”

So let this be said with no ambiguity:

The Magi did not smuggle polytheism into the world.

The Magi made polytheism **possible**.

They did not worship “many gods.”

They built the **space in which many gods can appear**.

When later religions amputate axes, the world does not become “purer.” It becomes **flatter**. First a plane. Then a line. Then a direction. Then a command. Then a desert.

This chapter is not about beliefs. It is not about myths as stories. It is not about symbolism as decoration.

It is about **ontic architecture**.

And because this architecture is ruled by Div, and because Div is the first axis, and because in the language of later ruins Div is called Devil, this family must be named correctly:

Not the Ontic Family of God.

But the **Ontic Family of Devil**.

هرچه بادا باد

1. Div — The First Axis (Meaning, Time, Definition)

Div is the axis of **meaning**.

Meaning is not opinion. Meaning is not interpretation. Meaning is **definition**. It is what makes a thing be *this* and not *that*. It is what gives a thing a boundary in time, a place in sight, an identity in the world.

This is why Div is also the axis of **time** and **truth**. Because time is what orders meaning, and truth is what holds meaning in place.

In the Magian imagination, Div is sun, bull, phallus, lord, protector. Not because they were “poetic,” but because these are **structural images** of the same function: support, definition, fertilization, ordering, standing-above.

Div is not “evil.” Div is **lordship**.

Group One: EL — The Definite Article of the World

Every language has something called a “definite article,” even if it doesn’t know it by that name.

In English: **the**

In Arabic, Aramaic, Akkadian: **al / el**

In Hebrew: **ha**

In Latin forms: **de / di**

In Romance languages: **el / il / le**

What does the definite article do? It **defines**. It cuts something out of the fog and says: *this one*. Not any horse. **The** horse. Not any door. **The** door.

This function—this act of definition—is not grammatical trivia. It is **ontic**. It is the axis of meaning doing its work inside language.

So when ancient worlds say **El**, they are not “naming a god” in the modern sense. They are pointing to the **defining axis itself**. The power that makes things be *this* and not *that*.

Vocals don’t matter. Structure does.

El, al, ha, de, di — these are **ontic cousins**, not etymological accidents.

Group Two: Bel / Baal — Will, Lordship, Phallus

Now take the same axis from another angle: **will**.

In Canaanite worlds he is Baal. In Semitic languages, Baal means lord, owner, master. In Hebrew, the same root slides into **val / bal / wil**. B and W are interchangeable in these old tongues. “Will” is not far from Baal. It is Baal seen from the inside.

Baal is the **beheaded sun** in later mythologies. But before he is beheaded, he is simply **sovereignty**. The force that says: this shall be so.

Add a Greek mouth to Baal and you get **Baalus**. Let that mouth chew it for a few centuries and you get **phallus**. That is not an insult to philosophy. It is a confession by language. The axis of meaning is also the axis of **generation**, of command, of projection into the future.

Bel is called the son of El in some traditions and identical with him in others. That confusion is not a mistake. It is the sign that we are dealing with **one axis seen from two faces**: definition and will.

Group Three: MN — Man, Meaning, Main

Phoenician, the first great alphabetic machine, wrote only **consonants**. Not because they were primitive, but because ontic cultures know that **vocals change** with accent, but **structure remains**.

So they wrote this axis as **MN**.

You can read it as:

- Man
- Mean
- Min
- Main

All of them are correct. Because they are all pointing to the same function: **the main axis of meaning**.

This is why “man” is not just a biological creature in ancient speech. Man is **the measure**. The one who defines. The one who names. The one who stands in the place of meaning.

When Jesus says “I am the son of Man,” he is not being poetic. He is placing himself inside this **ontic grammar**, whether later theology understood it or not.

Group Four: Demon / Devil — The Same Axis, After the Fall

Now take **The Baal**: the Will.

Or take **The Man**: the Meaning.

Prefix them with the definite article, with the defining cut, and language does what language always does:

- The Man → Demon
- The Will → Devil

This is not wordplay. This is **ontic sediment**.

Originally, Demon and Devil are not names of evil. They are **names of the first axis**.

They became “evil” only after this axis was **amputated** and then **slandered**.

So let this be said clearly:

Demon is not Satan.

Devil is not Satan.

They are **Div** — the axis of meaning — after history lost its nerves.

They were used interchangeably because ontology was lost, and when ontology is lost, **axes collapse into insults**.

Conclusion: Why This Family Is Called the Family of Devil

Div is the head of this family.

Div is the axis of meaning, time, truth, definition.

Because later ages buried him and cursed him, his name became “Devil” and “Demon.”

So now we name the species correctly:

Not because they are evil.

But because **they were turned into evil**.

Two consequences follow:

1. None of these are “gods” in the later monotheistic sense. God, in the Magian world, is the **female axis of being** (Izad). Div is not God. Div is **lordship**,

meaning, definition. Modern mythology confuses God and Demon because it is **ontically blind**.

2. “Demonization” as a verb only makes sense in a world that already **murdered Div**. After the propaganda, “demon” became a synonym for “evil.” That is like throwing your king into a pit for centuries and then using the word “king” to mean “garbage dump.” Language remembers the crime, but backwards.

So no, demon is not bad.

He is **your lord** — whether you like that sentence or not.

And the amount of historical hatred poured onto this axis is not an accident. It is the signature of a **successful amputation**.

Signal of Method

What follows is **not** a lesson in comparative mythology and **not** a museum of dead etymologies. We are not tracing words; we are tracing **axes**. Names survive conquests. Myths survive amputations. Structures survive even when history lies about them.

Therefore we use an **ontic method**:

- We privilege **function over phonetics**
- **Structure over spelling**
- **Consonants over vowels**

Because vowels rot with accents, and accents rot with time—but **axes persist**.

From here on, when names shift, it is not because cultures were “confused,” but because **the same axis kept walking through different mouths**.

We are still inside **Div**: the first axis—the axis of **meaning, truth, time, and definition**.

This is not a god. This is a **pillar**.

And pillars, once broken, are later called “demons.”

The Solar Stub — RA / AR / R

Group Five Names: **RA**

RA is the sun. Div stubs are reversible: **AR**.

The letter **R** itself belongs to him.

Here stands **Horus the Elder**—and this distinction matters.

He is **not** love.

He is **not** flight.

He is **not** escape.

He is **meaning**.

Horus the Elder is **bull**, not falcon.

He is the truth **axis**, not ascent.

He belongs to **Div**, not to the next generation.

The later Horus—the winged one, the lover, the flier—belongs to another axis, that we will discuss in another chapter.

Here, we are still in the **sun as meaning**, not the sun as love.

The Twin Number — TEN / TAY / DIN / DAN / TIN / TAN

Group Six Names: **TEN**

Ten in Persian is **Dah**.

It is cognate with **Do / De / Di**.

Div is both **Two** and **Ten**.

This is not a joke of numerology; it is a **structural memory**.

Because this clan counts by **eight**.

When the first round finishes at eight, **nine becomes 11**, and **ten becomes 12**—which is **two in the next cycle**.

So **Ten is the twin of Two**.

Now watch the names line up:

- **Tay** (Turkish): twin, counterpart, companion
- **Din** (Arabic/Aramaic): judge — the one who **measures meaning**
- **Dan / Dianat**: the one who **introduces the way**
- **Tingir / Dingir / Tangri**: the demon-god of shamanic and Sumerian worlds

The consonant shift is easy: **T ↔ D**.

Cultures change. Mouths change. The **axis does not**.

All these names are **one function**:

The axis that **defines, judges, pairs, and measures**.

That is Div.

The Bull Names — HR / SR / ZR / TR

Group Seven Names: **HR / SR / ZR / TR**

Here the shifts are ancient and mechanical:

H → S → Z

That is why Persian **zar** / **sar** means **head**—and also **phallus**.
Even modern **Sir** still carries the ontic echo: **lord**.

Here belongs **Horus the Elder** again—not the falcon, not the lover, but the **bull**.

Here belongs **Tur**—bull, strength, pillar.

Here belongs **Thor**—the sun in the North.

Here belongs **Taurus**—the king of zodiac and the axes of meaning.

This is not about beasts.

This is about **load-bearing symbols**.

That is why:

- **Tur** defines Turanian identity
- **Thor** stands as meaning pillar in Norse myth
- **Ashur** appears as a **winged sun disk** and a **winged bull**
He is not a random god. He is **Div wearing Assyrian armor**.

Geography remembers what theology forgets.

Turkey still says **Tur**.

Names are fossils of axes.

Zoroaster — The Zar-Bearer

Signal of Mode Change

Up to here, we were inside **names and structures**.

Now we step into **history's debris field**.

Not to beg documents.

To read the **scar tissue**.

The Consonantal Rule

Sacred names must be read in the **Phoenician way**:

Consonants first. Vowels later. If ever.

Because across millennia:

- Nations change
- Languages fracture
- Accents mutate

But **SR = TR = ZR** remains structurally stable.

Do not argue about **Zar** or **Zor** or **Zur**.

Only the **initial vowel** might matter for soundness.

The **spine** is the same.

Zartosht, Ontically

Rhetorical etymologies of “Zartosht” are dead.

We do not exhume them. We **reconstruct the axis**.

We know this much now:

- **Zar / ZR** = Div = bull / sun / phallus / meaning-axis
- What remains is **Tosht**

Two shifts are enough to explain it:

1. Old Persian **sh** → **s**
2. Old Persian initial **t** → **d**

So **Tosht** → **Dost** (دوست)

Dost means **lover**.

This yields something clean and brutal:

Zar-Dost = Lover of Zar

Zartoshti = Those who gather around Zar

Ontically, this makes perfect sense in two ways:

1. **Dusti** (friendship / love) is the oldest form of **bonding around an axis**
2. What modernity calls **X-ism**, older worlds called **X-lovers**

So Zartoshti are not “followers of a prophet.”

They are **those who gather around the first axis.**

The Bull in the Gatha

This is why, in the oldest layer of the Avesta—the **Gatha**—Zartosht begins with a **long address to a bull.**

He is not being poetic.

He is **speaking to Zar.**

He is **inaugurating his mission by invoking the axis.**

Zoroaster was not a reformer of moral theology.

He was a **banner-bearer of Div.**

A **Zar-lover.**

Turan, Iran, and the Theft of a Name

Now the cut goes deeper.

Turan, as its name already confesses, belongs to **Tur / Zar**.
The **real Zar-cult** lived there.

Shahnameh (the epic book of Ferdowsi) itself tells you:

Iran invades Turan from the East.

After the slaughter, something obscene happens:

The killers **keep the name**.

They keep calling their **Ahuramazda monotheism** “Zoroastrianism”—
A religion that has **nothing to do** with Zar, Tur, or the axis of meaning.

This is not a “rupture.”

This is **theft worn as inheritance**.

So yes:

There are **two Zoroasters**.

1. The original:
The **Sage of Zar**, the **Zar-lover**, the **Turanian axis-bearer**.
2. The later mask:
The **Iranian prophet** retrofitted onto a **monotheistic theology** that
amputated Div.

Calling this “downplaying” would be dishonest.

This is **mytho-historical hijacking**.

The Phallic Verdict (No Detour)

Zar is phallus, because Baal is phallus, because bull is phall.
We don’t open the discussion of phallism here, that belongs to my other book (The Phallic Signal). We are not reopening that here.

What matters here is simple and lethal:

The original Magi were **phallic** because the axes of meaning, truth and time: is phallus.

When the axes were cut, what remained was **shame, censorship, and caricature.**

The pillar became “obscene.”

The axis became “demonic.”

And the world became **flat, then linear.**

Final Cut

Zoroaster was not born in Iran.

Zoroaster was not preaching Ahura.

Zoroaster was **Zar’s man.**

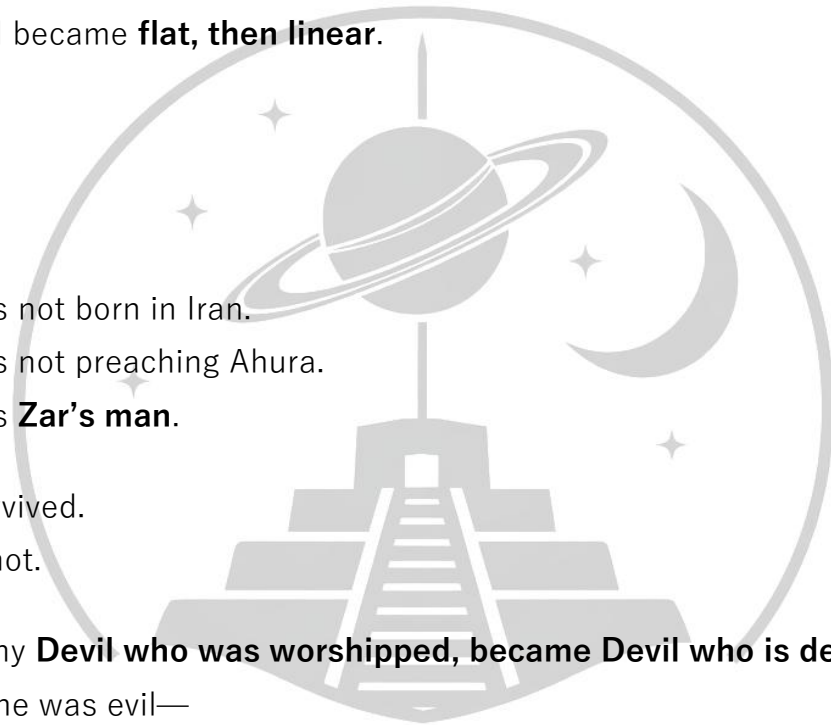

The name survived.

The axis did not.

And that is why **Devil who was worshipped, became Devil who is despised.**

Not because he was evil—

But because **he was buried first.**

2. Jinn / Cin (The Axis of Ascent, Love, and Freedom)

In the Magian ontic system, the second active axis after Div is called **Jen / Cin**.

Its **cosmic symbol** is the **Moon**.

Its **body-symbol** is the **phallus**.

Its **function** is **ascent, love, and freedom**.

Structurally, **Jinn is born from the unification of Being (Izad) and Meaning (Div)**.

Meaning alone is vertical and rigid.

Being alone is fertile but flat.

Their unification produces a **third dimension: ascent**. This is what allows **space** instead of plane. This is also what allows **movement not only forward and backward, but upward**. In ontic terms, this is **flight**.

Therefore:

- Div = axis of meaning (Sun)
- Izad = axis of being (Life)
- Jinn = axis of ascent (Moon)

Without Jinn, existence remains **planar**. With Jinn, existence becomes **spatial**.

Sin / Cin in Sumer

In ancient Sumer, **Sin** is the **Moon-god** and the **father of Inanna / Ishtar**. He is also the **son of Enlil** (the structural reason for this will be shown in the Enlil section).

We insist on writing this name with **C** (Cin), not **S**, for a structural reason: Only in the **Turkish form “Cin”** does the word naturally produce the pronunciation “**Jin**”, which directly reveals its ontic identity: **Jinn**.

Therefore:

- Cin / Jin / Jinn are **the same axis-name** in different phonetic systems.
- This is why in Arabic and Persian, **jinn** refers to a whole class of beings: The clan of the jinn **جنان اجنه / جنیان**. They are **not random spirits**; they are **derivatives of the lunar axis**.

In modern languages, **sin** means any action against religion, ethics, or law, and its followers are called **sinner**s. This semantic reversal is not accidental. When the **axis of ascent/love** is amputated, **everything related to it** is reclassified as **crime, deviation, or impurity**. The word did not change; **the ontology collapsed**.

So:

- Originally: Cin/Jinn = axis of ascent and love
- After amputation: Sin = violation, guilt, transgression

This is not moral evolution. It is **ontic inversion**.

Khonsu in Egypt

In ancient Egypt, **Khonsu** is the **Moon** and the **son of Amun**. Structurally, this matches the same pattern:

- The Moon is **a primary axis**.
- It is **born from** a higher generative principle (Amun / Enlil in different systems).
- Its function remains the same: **movement, travel, ascent, and circulation**.

Therefore, **Khonsu = Cin/Jinn = Sin** in different civilizational encodings of the same **ontic function**: the **axis of ascent and freedom**.

3. Izad (The Axis of Being and Life)

In the Magian system, **God is female** and her name is **Iz** or **Izad**. Her function is **Being itself**. Nothing can exist without her. She is **ontologically prior** to any form, meaning, or law.

Her **symbolic letter** is **C**.

C represents **the cave, the womb, the vagina**: the **place of emergence**.

Her fundamental property is **warmth**.

Being is not cold. Being is **generative**. Womb **produces life through heat**.

This root is visible in Turkish (Turanean):

- **ISI** = warmth
- **İsti** = warm
- **İstiyorum** = “I desire”

Desire is not psychological here; it is **ontic heat**. This is why Izad is the **source of desire**. Desire is not lack. Desire is **thermal drive toward being**.

This is an ontic concept, not a metaphor.

Name Continuities

- **ISI** + Greek suffix → **Isis** (Egypt)
- **İsti** (warmth and desire) → **Ister** → **Ishtar** (Mesopotamia)

In Persian Magian tradition she is **Iz**.

Here we are not rejecting that; we are identifying its **older root** in Turkish/Turanean **ISI**.

Even the modern English **“She”** still carries her trace: C

Across languages:

- Sanskrit: **Jahi**
- Persian Magi: **Iz**
- Sumerian: **Ish**
- Combined with “god” (Tari): **Iz + Tari = Ishtar**

Her **animal symbols** are:

1. The **flying snake** (dragon)
2. The **great bird: Simorgh / Anka**

The Phoenician Reduction: C

Phoenicians solved the naming problem structurally: **C**.

Because:

- C can be read as **Si** or **Is** (vowel variation)
- The **consonant** is what carries the axis, not the vowel

So:

- She is **C**
- She is also a **bird**
- Therefore she is **C-bird**

In Persian, bird = **morgh** (مرغ)

So **C-morgh = Simorgh** (سیمرغ)

This is not poetry. This is **structural encoding**.

In Egyptian Magian (Medjay) vision, she is the **Womb**.

The archetypal womb is called **Ankh**.

Hence **Anka** / **Anqa** becomes another name for **Simorgh**.

Different images, **same axis**: Being-as-source.

The Majestic Names of the Female God

The Magian rule is strict:

The majestic name of the female God is built by **repeating her own stubs** or **combining them**.

Example 1: Isis

- **Is** is one of her stubs
- Repeat it: **Is + Is = Isis**

Example 2: Yahweh (YHWH)

This is a **Persian Magian construction**, not a Hebrew invention.

- **Yah / Jah / Jahi** = one of her stubs (daughter of Ahriman in mythic layers)
- **Ah** = another major stub of her
- **O / W** = “and” (in Persian, used to connect two stops)

So:

- **Yah-o-Ah = Yahowah → Yahweh (YHWH)**

Structurally, this name follows **exactly** the Magian rule for **female divine names**.

The Usurpation

The axes of **love (Jinn)** and **meaning (Div)** were amputated.

Being (**Izad**) cannot be killed, but it can be **buried**.

What happened historically is this:

- The **name** built for the **female axis of Being** was **kept**
- The **function** was **reversed**
- The name **YHWH** was reassigned to a **masculine, anti-ontic deity** in a system that **destroyed the axes: the only left axes of the magi space gets reversed**.

So:

- A **Magian female name of Being**
- Was used for a **masculine god of a reversed ontology**
- And this god **occupied the throne of Living (which is not Being)** for over 3000 years

This is not reinterpretation. This is **structural usurpation**.

The Axes That Can Die

The Magian system is **not Cartesian** and **not static**.

It is **dynamic** and **historical**.

Not every creature in the ontic space is an axis.

But even **axes can be amputated**.

The sequence is structural and repeatable:

1. First, the **axis of ascent/love (Jinn / Moon)** is amputated.
→ Love is criminalized.

→ Ascent becomes heresy.

→ The Moon “dies”.

2. Then, the **axis of meaning (Div / Sun)** is amputated.

→ Meaning collapses into law, command, and obedience.

→ The Sun “dies”.

3. Finally, **Being (Izad)** is **buried alive**.

→ It cannot be killed.

→ But it is **covered by “living”**, which is not Being.

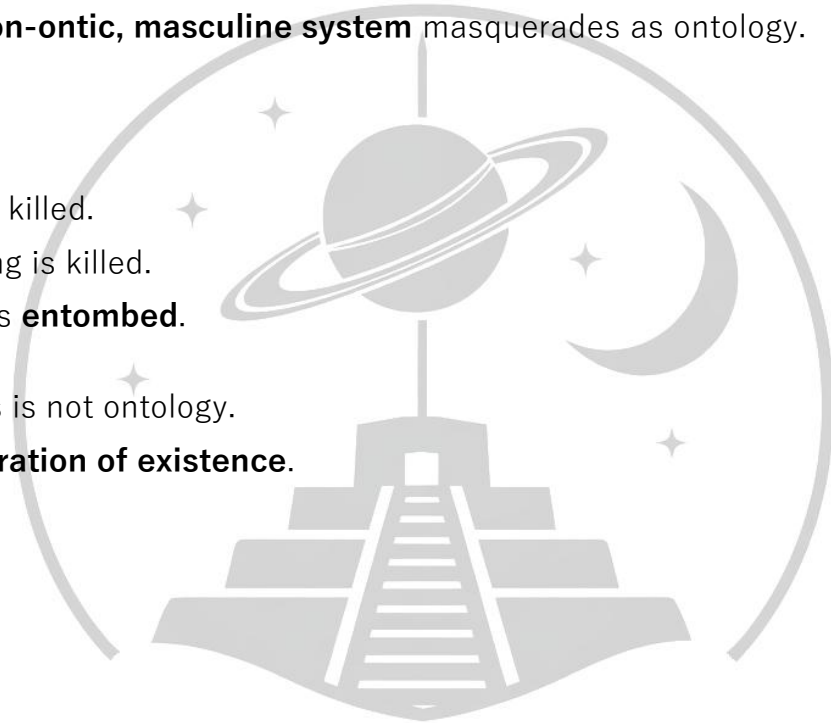

→ A **non-ontic, masculine system** masquerades as ontology.

So:

- Love is killed.
- Meaning is killed.
- Being is **entombed**.

What remains is not ontology.

It is **administration of existence**.

4. Dad (The Reconstructed Axis of Meaning)

Dad is symbolized by the **ram** and the **crescent moon**.

His body-symbol is again the **phallus**.

Functionally, Dad is a **replacement axis of meaning** after the original axis (Div / Sun) has been amputated.

At this stage of the collapse, **Iz (Being)** is left alone. The axes of **Meaning (Div)** and **Ascent (Jinn)** are gone. What remains is not a three-dimensional space and not even a proper plane. What remains is a **degraded line**: on one side **Being**, now hidden; on the other side **“living”**, which continues without ontology and survives only as function, rule, and repetition. This is the condition that persists for millennia.

In Magian structural terms, this produces a paradox: Being cannot operate without meaning, but meaning has been destroyed. The system cannot continue unless a **new support** for Being is constructed.

The Magian solution is not theological. It is **ontic and temporal**.

The Temporal Paradox and Its Resolution

The Magian model states:

- Meaning supports of Being.
- But Being must already **exist** for any birth to occur.

This is the classic paradox: **does the hen come before the egg, or the egg before the hen?**

The Magian answer is: **neither in linear time**.

The solution is **temporal inversion**:

1. Being (Iz) moves **backward in time** to a point before the he “father” exists.
2. Being gives birth to **her own father**.

This is not metaphorical. It is a **structural solution**: the system generates a **new axis of meaning** retroactively, so that Being can continue to exist with support.

This new axis is **Dad**.

Properties of Dad

- Symbol: **Crescent Moon**
- Animal symbol: **Ram**
- Number: **4**
- Function: **Reconstructed meaning**
- Role: **Support of Being after the collapse of Div**

In the first phase, the axis of meaning was the **Sun (Div)**.

In the second phase, the axis of meaning becomes the **Moon (Dad)**.

This is not continuity. This is **replacement**.

The Turkish/Persian name “Dad” is not accidental. Even in modern English, **dad** still means **father**. This is not a coincidence of sound. It is a **survival of function**.

The Problem of Naming: Dad as Role and as Name

Dad is not only a role. He is an **archetype**. Therefore he requires **ontic names**.

In the earlier system, the great supporter of Iz was **Div**:

- El / De / The (definite article)
- MN (Man / Min / Mon)
- Ra

Dad **does not receive a new independent essence-name**. All Magian naming systems deliberately encode him as:

“The same as Div for Iz.”

This rule governs all his major names.

Naming Method One: Thoth / David

Thoth

Thoth is one of the oldest names of this function. He is not just a dad; he is the **archetype of fatherhood-as-meaning**: measurement, judgment, order, and support.

David (DVD)

David is not a historical coincidence here. Structurally:

- **Dad / David / Thoth** encode the **same ontic role**.
- The consonantal structure **D–V–D** is simply another rendering of **Dad** and Thoth.
- The function is identical: **supporting, measuring, establishing**.

So:

- Thoth = Dad (functionally)
- David = Dad (structurally encoded)

Different cultures, same **ontic role**, Same Magi.

Naming Method Two: The Majestic Construction Formula

The Magian “majestic name” اسم اعظم is built with a **strict ontic formula**:

He is (like Div) for Iz

In structural components:

1. The old axis of meaning: **Div** (El / Man / Al, etc.)
2. The preposition “**for**” (Ra / L / etc.)
3. The name-stub of Being: **Iz / Is / Ah**

This formula does **not** produce a personal name. It produces a **function-name**.

Example 1: Israel (Persian Magi Construction)

Components:

1. Div = **El**
2. “For” = Persian **Ra** (را)
3. Iz = **Is**

Put together:

- **Is-Ra-El = Israel**

Meaning:

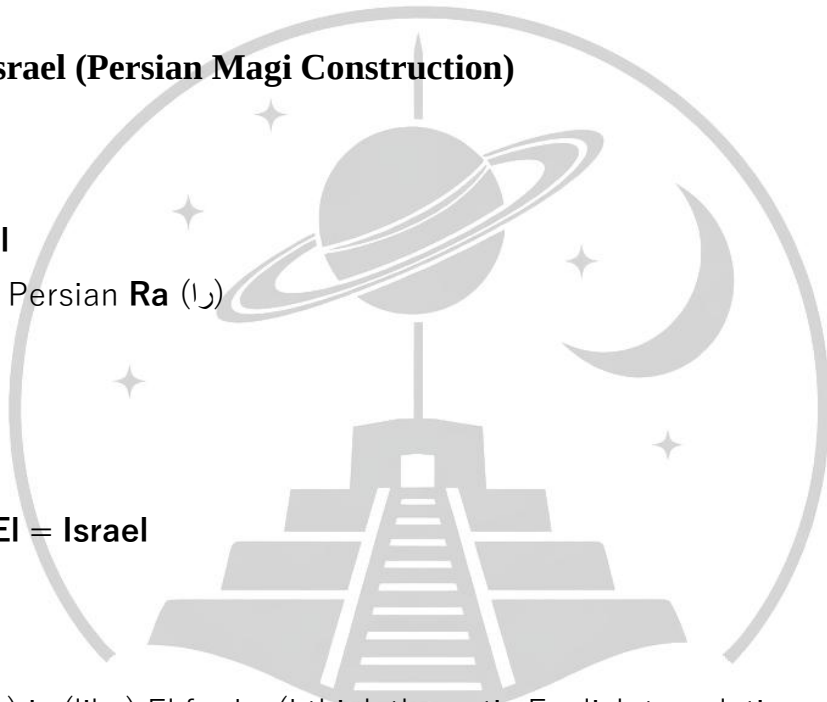

This (new axis) is (like) El for Is. (I think the ontic English translation of Israel will be: El-for-Is because the direction of possession structure in Farsi compared to English is reverse)

Conclusion:

Israel is the name of the new axis of meaning. He is Dad

It is **lunar**, not solar. It replaces Div.

Example 2: Ahriman (Persian Magi Construction)

Ahriman is always depicted with **ram horns**, which already marks his function.

Components:

1. Div = **Man**
2. “For” = **Ra / Ri** (phonetic reduction of Ra)
3. Iz = **Ah**

Note on phonetic shift:

- The **s** → **h** shift is well-attested in Magian transfers:
 - Suma → Huma (the sacred magi wine)
 - Mesr / Mehr (Egypt / Mithraic layer)This is structural, not accidental.

Put together:

- **Ah-Ri-Man = Ahriman**

Meaning:

This (new axis) is (like) Man for Ah.

This is **ontically identical** to Israel. Different phonetics, **same structure**.

Example 3: Allah (Arabian / Aramaic Magian Construction)

Components:

1. Div = **Al / El** (Arabic definite article ال)
2. “For” = **L** (Arabic ل, as in “for”)
3. Iz = **Ah**

Put together:

- **Al-L-Ah = Allah**

Meaning:

This (dad-axis) is (like) Al for Ah.

He is like Div for Jahi. Dad is “demon for” Ah.

Structural Conclusion on the Names

- **Israel, Ahriman, and Allah** are **ontic equivalents**.
- They are **not** historical accidents.
- They are **not** phonetic coincidences.
- They are **not** independent deities by origin.

They are all **names of the same reconstructed axis of meaning: Dad.**

Important Note 1

Magian systems **deliberately refuse** to give Dad a completely new essence-name.
The encoded message is:

Dad is the same as Div, but now in a degraded, reconstructed role.

He is **definition without sun**.

He is **meaning without ascent**.

He is **support without space**.

Important Note 2: On Non-Ontic Etymologies

Any attempt to explain these names **only** through:

- Historical linguistics
- Phonetics
- Political history
- Textual borrowing

...is structurally blind.

That is like:

- Explaining an electromagnetic field with a grocery scale
- Or breaking a watch with a hammer to “see how it works”

You destroy the structure and then claim there was no structure.

On Historical Depth

The only way these names (Israel, Ahriman, David, Allah, Thoth) can be **structurally identical** across cultures is this:

They originate from a time **before** they were separated and hijacked by different systems.

A reasonable lower bound for this split is **around the end of the last ice age**, roughly **11,000 years ago**—the period when the **reconstruction of meaning** (Dad) becomes necessary after the collapse of the older ontic space.

Final Position of Dad in the System

- Div (Sun) = original axis of meaning → **amputated**
- Jinn (Moon as ascent) → **amputated**
- Iz (Being) → **buried but alive**
- Dad (Moon as meaning) → **constructed replacement**

And every religion that centers on **Israel / Ahriman / Allah** is, structurally, a religion of the **replacement axis**, not of the original Magian space.

Naming Method Three: “The Father of Is”

This model uses a different construction rule:

(This newborn axis is) the father *for* Iz.

Here the name does not say “this is like Div for Iz.”

It says, directly and without metaphor: **this is the dad of Is.**

Arabian / Aramaic Magi — Name 4: Eblis

Break it down:

1. **Eb / Ab** = father in Arabic and Hebrew
2. **L** = the “for” preposition in Semitic languages (as in “harness *for* the camel”)
3. **Is** = Iz, without change

Put into the formula:

Eb – L – Is → Eblis

Ontic meaning:

This is the father of Is.

Nothing mystical, nothing symbolic. It is a direct structural statement.

Conclusion:

Eblis, which the Qur’an later treats as a name of Satan, is ontically the same axis as Allah and Israel **and** Ahriman. **The structure is identical. The function is identical. The axis is identical.**

Who turned one name of this axis into the enemy of the same axis is a historical and political question, not an ontic one. Ontology does not negotiate with later propaganda. It only reads structure.

Naming Method Four: “The New Div”

This model uses a third construction rule:

This one is the new “for” Div.

Here **lz is not mentioned at all**. The formula does not speak about being. It speaks only about **replacement of the old meaning-axis**:

This is the new Div.

Akkadian / Hurrian Magi — Name 5: Enlil (the dad with the seven-layer ram horns)

Break it down:

1. **En / Yeni** = “new” (Hurrian / Akkadian / possibly older Anatolian usage)
2. **L** = “for”
3. **Il / El** = the definite article / Div-name

Put into the formula:

En – L – Il → Enlil

Ontic meaning:

This is the new Il.

This is the new Div.

No metaphor. No theology. A plain ontic label for the **reversed meaning-axis**.

Historical Control of the Name

Marduk enters the pantheon not as a rival to Enlil, but as his **name-keeper**.

Sargon of Akkad praises **Enlil** the same way Cyrus the Great does—almost two millennia later. From roughly **2450 BC to 550 BC**, Enlil functions as the **absolute sovereign axis** of meaning for the Magian world.

Over time, one change occurs—not in power, but in **ritual handling of the name**:

After centuries of sovereignty, the name **Enlil** becomes too heavy to pronounce. The reverence is not symbolic; it is practical. The speaker is not supposed to risk standing directly under the weight of that name. So the Magus says “**Marduk**” but **means Enlil**.

This is not speculation. This is exactly what Cyrus states on the Cylinder:

Marduk is great because he is the Enlil of the gods.

That sentence only makes sense if **Enlil** is the real axis and **Marduk** is the spoken mask.

So the structure is clear:

- **Enlil** = the new Div, the reversed meaning-axis
- **Marduk** = the public-facing name of that same axis
- The function never changed. Only the **handling of the name** did.

Naming Method Five: The O / A / U Jump (“He Is”)

The fifth method does not build the name with **Div** or **Iz** or **Dad** directly. It uses a **linguistic operator** that means:

“He is.”

“This is.”

“This one exists as.”

Across languages this appears as:

- Turkish: **O**
- Egyptian / Phoenician: **A**
- Persian: **U**
- Arabic: **Hu**

Many ancient languages use a bare vowel or breath-sound to assert **existence**.

Turkish example:

O bir kap = It is a vessel

Remove **bir** to compress it:

O-kap = It is vessel

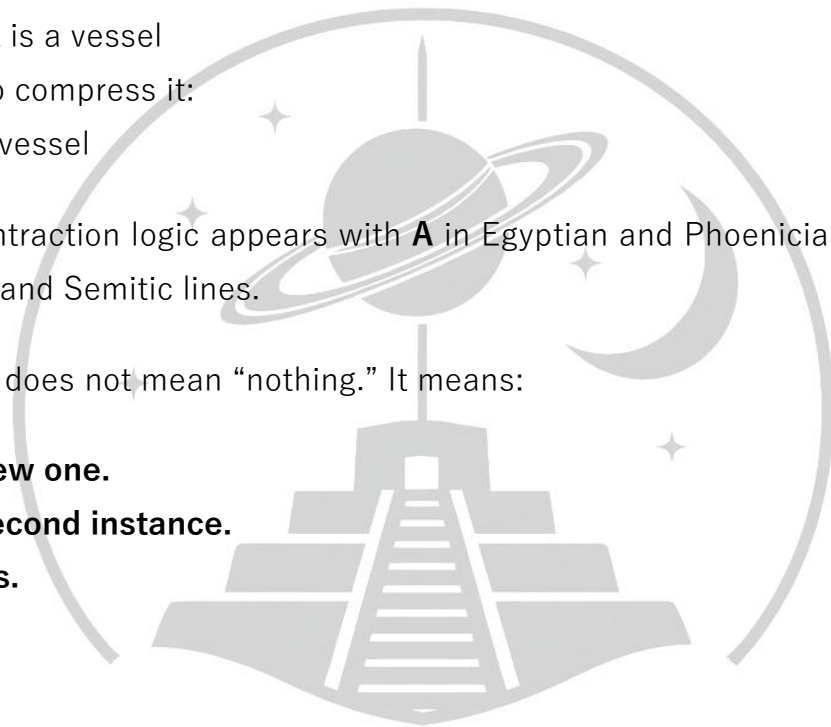

The same contraction logic appears with **A** in Egyptian and Phoenician and with **U** / **Hu** in Iranian and Semitic lines.

This operator does not mean “nothing.” It means:

This is the new one.

This is the second instance.

This exists as.

Norse — Majestic Name 8: Odin

Here **O** = “He is”

Din / Tin / Tengri / Dianat = law, order, cosmic rule

So:

O-din = He is the (new) Din

This fits the Dad-axis perfectly: **continuity, law, order, meaning after rupture**.

Egyptian Magi — Majestic Name 9: Amun (with ram horns)

Break it:

- **A** = He is
- **Mun / Min / MN** = the old Div-name

So:

A-mun = He is the new MN

Critical point:

This shows **Amun and Min are not the same.**

- **Min / MN** = Div (the old sun-meaning axis)
- **Amun** = Dad (the new, reversed meaning axis)

Same root. Different generation. Different direction.

The “Second Man” Pattern

Now look at these:

- **O-man / A-men / Ye-men**

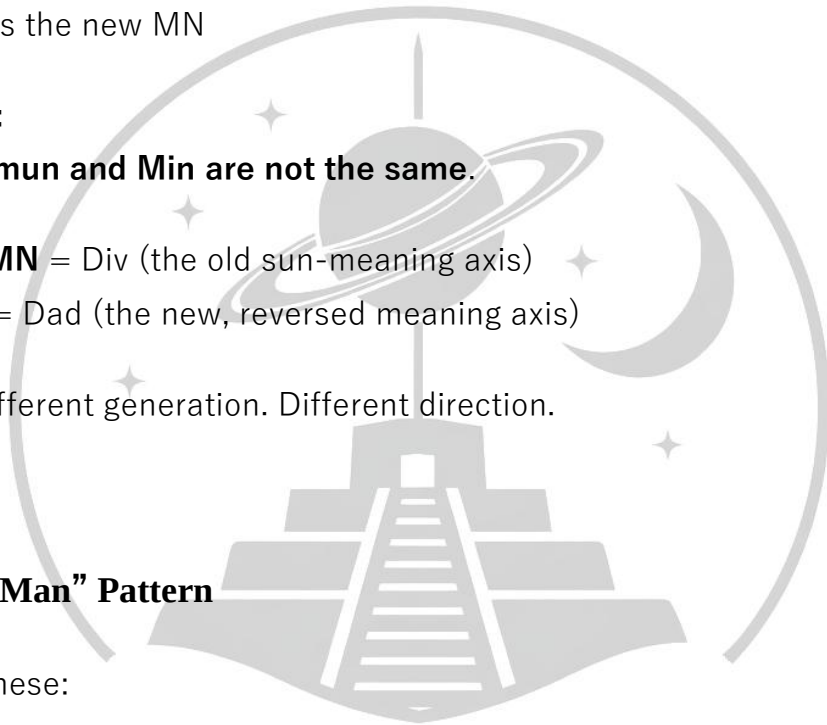

All mean structurally:

He is the Man.

The second Man.

The new instance of Man.

Again: not a personal name. An **ontic label**.

Conclusion: Country names like Oman and Yemen in modern times that have successfully survived the Islamic era, show how strong, longstanding and widespread the Amun has been in all of these regions.

Note 1: Christians use the word “Amen” after their prayers. Muslims use the word Amin after their prayers. Both of them are the same: Amun. The root of this insight is: Even though they moved away from Amun, but their ancestors were sure that “no one but Amun” can grant wishes.

Egyptian Magi — Name 10: Osiris

Greek adds **-is** as a suffix. Remove it.

Core form:

O-sir = He is SR

SR / Sur / Tur / Hur = Div, meaning, truth

So:

Osir = He is the (new) SR

He is the downward axes of meaning. Osiris is Dad

Note: Osiris is outstanding for being traceable among other names of Dad. According to over 5000 year Egyptian thumb inscriptions Ra travels with his vessel (Barqu) on the air, while Osiris is in the bottom of the “ontic clock”, on 12 AM. This position is the position of meaning, truth and judgment. Ra and Osiris meet every night on 12 AM.

Note: Osiris is a Persian name which has taken Greek suffix: Osir, is in fact Azar: He is Zar. This Zar is div, and he is the same thing (phallus) that original Zoroastrianism was revolving around it (before it became a monotheism).

Zoroaster, Turan, and Azar

The original Zoroaster could **not** worship Zar directly.

To worship Zar, one must worship **Azar** — which is **Osir** in Persian form.

Osiris sits in the **9th month of the Zodiac**.

In the Persian calendar, that month is called **Azar**.

This is not coincidence. It is structural identity.

So:

Osiris = Azar = Ahriman (as Dad-axis)

This means **Turan and early Zoroastrianism** were centered on **Azar / Osir / Ahriman as Dad**.

This is why Iranian history is divided into:

Pishdadi = “before Dad”

and after.

The rupture point is **522 BC** when Iranians overthrow the “Israelite” Zoroastrianism of the Persian Magi, because Israel=Ahriman=Dad. Pishdadi means: Before Israel was overthrown.

Conclusion here is sharp and non-negotiable:

Israel is not the usurper. Iran is.

Arabic — Name 10: Hubal

- **Hu** = He is
- **Bal / Baal** = the old lord / son-axis

So:

Hu-bal = He is Baal

The new Baal

At the Battle of Uhud, Quraysh (the wealthy tribe of Mecca who were against Muhammad) chanted:

Hubal is greater

Muslims answered:

Allah is greater than Hubal

From an ontic standpoint, this fight is **structurally blind**:

Allah and Hubal are built by the same naming logic.

They point to the same axis-generation mechanism.

The war is historical. The structure is identical.

Critical Warning

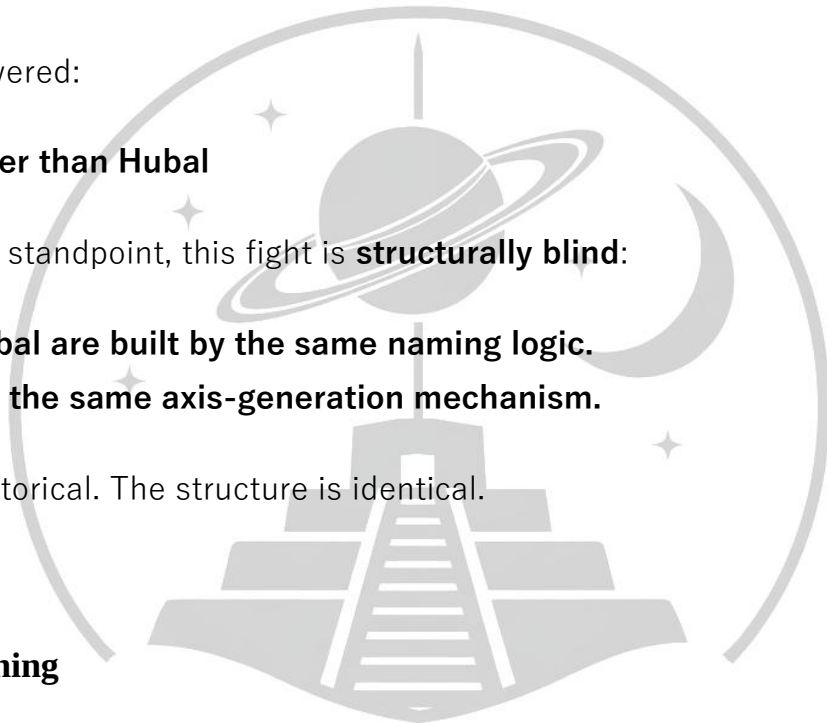

Do **not** treat initial **O / A / Hu** as “empty sounds.”

They mean:

Second instance

New generation

Continuation after rupture

Structural Conclusions

- **Amun ≠ Min**
 - Min = old Div
 - Amun = new Dad-axis of meaning

There is also a phonetic evolution:

O / A → Hu (for easier pronunciation)

So you get:

- **Hur = Hu + Ra** = He is Ra (junior Horus)
- **Hubal = Hu + Bal** = He is Baal (new Baal)
- **Apollo = A + Polo (Baal)** = He is Baal

Same machine. Same rule. Different masks.

Naming Method Six: Satan

Using the Mother's Name as Suffix

This method looks strange at first, but it is structurally precise.

If you want to name the **new axis of meaning** (Dad), you can do it by anchoring him directly to **Iz**, whose ontic letter is **C / S** ("She", Being).

Instead of saying:

"This is Tan for She"

You **attach Tan to She** and produce a single name.

So you get:

Shi + Tan = Shitan (شیطان)

Si + Tan = Satan

The structure is:

- **Si / Shi** = Iz (Being, She, C)
- **Tan / Dan / Din** = the meaning / law / order axis

So:

Satan = the Tan of She

The meaning-axis that belongs to Being

Conclusion is structural, not rhetorical:

Satan is not the adversary of God. He is her counterpart and supporter.

By structure, **Satan** is the same axis already named as:

Allah, Israel, Ahriman, Amun, Enlil, Odin, Demon, Devil

Different masks. Same position in the ontic machine.

Note: Actually every “O jump” as we explained in Naming Method Five is “daughter’s name added as prefix”. It means: daughter is Ah, and is reversible: Ha (Hebrew definite article). This is Ha that takes the form of O, A, U and Hu and becomes prefix of div to make dad names like Osir, Amun, Hubal.

Conclusion 2: Odin and Satan are not only identical in meaning, but also identical in semantic structure: Odin = Satan

Naming Method Seven: Mahdi

The Moon-Devil Formula

This formula states the generational shift explicitly:

Div was the **sun-who was meaning**.

Dad is the **moon-who was meaning**.

So you name him as **Moon + Div**.

Persian Magi Name: Mahdi

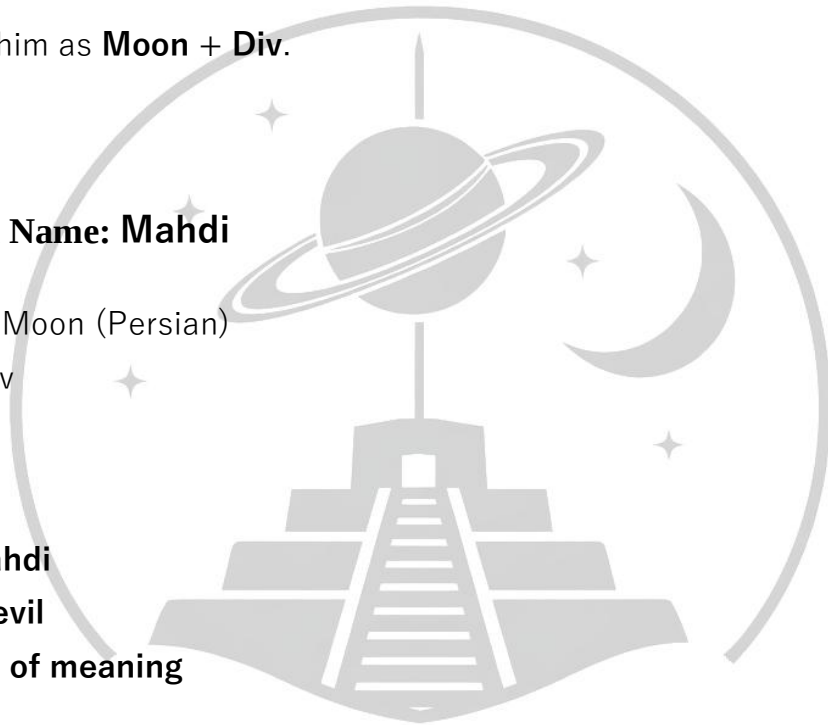

- **Mah** = Moon (Persian)
- **Di** = Div

So:

Mah-Di = Mahdi

The Moon-Devil

The new axis of meaning

Muslims call Mahdi “the lord of time,” without realizing that **time is one of the core functions of the meaning-axis**. They are naming the axis without knowing the structure.

Indian Magi Name: Mahadiva (as in *Mahadiva Shiva*)

- **Maha** = Great / Moon
- **Diva** = Div

So:

Maha-Diva = the Great Div / the Moon-Div

This places **Shiva (as Mahadiva)** exactly in the **Dad** position in the Indian Magian structure.

Important Note: Diva vs Div

There is **no ontic difference** between **Diva** and **Div**. The difference is historical, not structural.

In the **original Indian worldview**, **Divas** are sacred. This is recorded in:

1. Vedas
2. Upanishads
3. Other ancient Indian sacred sources

The **Indo-Iranian split** begins exactly here.

The Iranian branch starts a **heresy**: they **amputate the Divas**.

Iranians did not leave their mythical homeland **Airyanem Vaejah** because they preferred warmer weather. They were **expelled** because they turned against the Diva-centered worldview.

The Indian side records this from the **victor's perspective**:

1. **Indra** riding the elephant, chasing the heretics westward out of the sacred land (Vedic sources).
2. **Varuna–Mitra, Varathraghna, Thraetona** were originally servants of the Divas. In Iranian mythology they are **systematically amputated and rewritten**:
 - **Mitra** is separated and reduced to an *Izad*.

- **Varathraghna** becomes **Bahram**.
- **Thraetona** becomes **Fereydun**, who now “fights the devil and wins” — the narrative is **inverted**.

This is not evolution. It is **surgical amputation of axes** and **mythological reversal**.

By the time Iranians move to the west and southwest, the **ontic structure is already broken**. This is why their lack of ethical limits appears **shocking** to the Magian world. The Magi could not fight an enemy that **doesn't recognized the ethics and virtue itself**. They lost because the war had left the ontic ground.

So far, we were looking at the Iranian problem from the **western side** (Medes, Persians). The **eastern record** shows the same fracture from the opposite direction and names the enemy clearly: **the amputators of the Divas**.

Final Irony

After more than **3000 years**, the same Iranians are now waiting for **Mahdi** to appear and save them — thinking this is an Islamic figure.

Structurally, they are waiting for the **return of the Moon-Demon** they themselves amputated.

They are desperately waiting for the **axis** they destroyed to appear as their savior.

Naming Method Eight: Ahuramazda

This is a **majestic name**, but it cannot be read correctly before **Mahdi** is understood. Structurally, **Mazda and Mahdi are the same construct**.

Why? Because:

- **Maz = Mah = Mas = Moon**

These are phonetic variants of the same lunar root.

Now apply the **Mahdi structure**:

- **Mah (Moon) → Maz**
- **Di (Div / Demon) → Da**

So:

Maz + Da = Mazda

Mazda = Moon-Div (Moon-Demon)

Now apply the **majestic-name formula**:

- **Ah / Ahu** = God (Jahi / Ahi, the Being axis)
- **Ra** = “for”
- **Mazda** = Moon-Div

So:

Ahura-Mazda = The Moon-Demon for Jahi

Structurally, this is **not** a pure “Dad” name. It is the **replacement of Mazda/Mahdi** while **keeping the same function**: the axis of meaning.

But there is a critical shift:

- **Mahdi / Mazda** = Moon-meaning
- **Ahuramazda** = Meaning re-solarized

So Ahuramazda is **no longer moon**. He is **Sun-Meaning** again.

In other words:

Ahuramazda = Div reborn in the next cycle after Ahriman

Same axis. Different phase. Moon → Sun.

Naming Method Nine: Mashih / Masih / Masiah / Messiah

This is again a **Persian Magi construct**.

- **Mas = Maz = Mah = Moon**
- **Ih / Yah / Jahi** = God (the Being axis, daughter of Ahriman)

So the formula is:

Mas + i + Yah = Mas-i-Yah

The Moon for God

The Moon of God

This produces:

Masih, Mashih, Messiah, Masiha

Structurally, **all of these are identical to Mahdi.**

Important note:

When Rabbis wait for **Mashiah** and Muslims wait for **Mahdi**, they are waiting for **the same axis**—the same Moon-Meaning they themselves amputated. Each tradition broke the structure from a different side and then started waiting for the missing piece to return.

Naming Method Ten: Cronus / Quran

Formula:

Dad = Div + ON / EN / AN (the marker of “new”)

Cronus

Cronus is Greek in form, but **Magian in structure**. Greek only added the “-us” suffix. The core is **Cron**. (you can find it in English structures like “corn” meaning phallus: Cornwall= phallus of Baal)

- **Cr / Kr / Sr** = cognate with **Zar / Sur** = Phallus = Div
- **On** = New

So:

Cr + On = Cron

Cron = The New Phallus = The New Div = Dad

Cronus is therefore the **axis of time, meaning, and truth**—which Greek mythology itself confirms by making him **Time**.

This makes Chronology a synonym of mythology, because Chronology is the study of Cronus, while Mythology is the study of Mahdi. We will discuss that Dad is Mot (meaning=death).

Quran

Same formula:

- **Qur / Kor / Kr** = the Div / Phallus root
- **On** = New

So:

Qur + On = Quran

The New Axis of Meaning, Dad

Important Note 1: The Phallic War Myth

Greek mythology says **Cronus** gained power by cutting the phallus of his father **Uranus**. This is not a neutral myth. It is a **Greek retelling of the Iranian–Magian conflict**, and it sides with the Iranian narrative.

We know:

1. **Uranus = Iranus (Iran / Aryan)**
2. **Cronus already means “the new phallus”** by structure.

So he does **not** need to steal a phallus from anyone. He **is** the phallus. While Greek myth is in furtively claiming that: His phallus (as the sign of rule) originally belonged to Iran!

Conclusion 1

The claim that “phallus belonged to Uranus/Iran and Cronus cut it off” is structurally false.

Why?

Because:

Time, Meaning, and Phallus are the same axis.

If Cronus is **Time**, then he is **already Phallus**. There is nothing to steal. The story is a **political mythologization** of an ontic transition.

Conclusion 2: Cron and Quran Are the Same Axis

Both **Cron** and **Quran** name the **Moon-Meaning axis** (Dad).

So it is not surprising that:

- A **book of meaning** carries the **name of the meaning-axis**.

Christians did the same earlier:

Bible = Bay-Baal (Turkish: Lord Baal)

So:

- **Bible** carries the name of **Div** (Sun-Meaning)
- **Quran** carries the name of **Dad** (Moon-Meaning)

Originally, both names made sense **inside the Magian ontic structure**.

Later, both books were **reversed and weaponized against that very structure**.

The only naming difference is simple and precise:

Bible = Name of Div (Sun-Meaning)

Quran = Name of Dad (Moon-Meaning)

Same machine. Different phase. Different hijacking.

Naming Method Eleven: Human

This is not a new method. We already encountered **Hu** in the **O/A/U jump** section. But it must be isolated, because it is structurally decisive.

- **Hu = “He is”**
- **Man = Div (MN: Man / Min / Mon = the Meaning axis)**

So:

Hu + Man = Human

Human = “He is Man” = He is (the same as) Div

This is a **perfect Dad-name**.

In Persian this survives as:

Hūman / Hāman / Homan (هومن / هامان / هومان)

When **Human** is Dad, several consequences follow immediately:

1. **Originally, “Human” meant: the one who is Dad.**

It was a **title**, not a species label. It named the **axis of meaning** in its second phase.

2. In a Magian society, every man was supposed to **model himself after Dad**—to become “human” in that sense.

But after reversal and amputation were completed, the word was **hijacked** and **flattened**: it was applied blindly to everyone who is not Dad, and has no idea about this Magic concept.

The title became a generic biological label. The structure was lost.

Magian Name Cluster: Haman / Khaman / Shaman / Hakhamanesh

- **Haman / Homan / Hūman** = Dad (Human)
- **Shaman** is the same construct in another phonetic environment.
- **Khaman** is the same word with an **H → Kh** shift.

Now look at history:

The **Quran** repeatedly pairs **Pharaoh** and **Haman**, as if they are functionally the same.

That is not a mistake. Structurally, it is exact:

Pharaoh = Dad

Haman = Dad

They are two instantiations of the same axis in two different traditions.

Now look at Persian–Median kings.

We are showing that this polity was **Israel** under another name. So their kings were called:

Khaman (Dad)

Since this land is **Israel** (misnamed “Iran”), the **Hebrew definite article** is placed in front:

Ha + Khaman = Hakhaman

Now add the Magian/Israelite divine suffix:

- Greeks add **~is**
- Magi/Israelites add **~esh** (with an **S → Sh** shift)

So:

Ha-Khaman-Esh = Hakhamanesh

This is not a family name. It is not a tribal label. It is a **sacred Dad-title**.

On the English Corruption: “Achaemenid”

In English, this name was deliberately **distorted** into:

Achaemenid

This form is so far removed from the original that it guarantees **no one will recognize the structure.**

But in Persian it is still there, intact:

Hakhamanesh = Dad

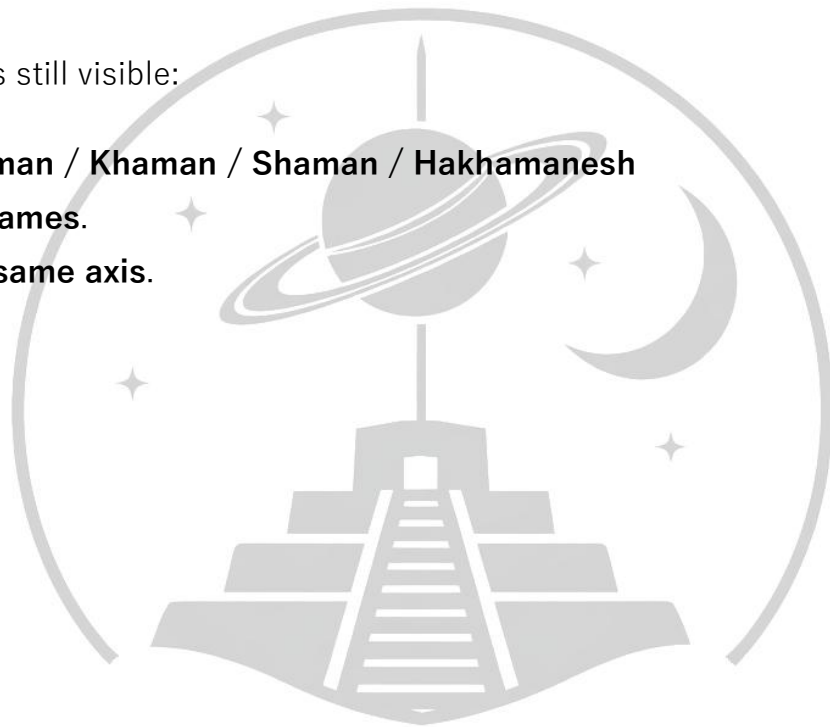

When ontology was lost, the name's **structure** was lost with it, and its etymology was turned into noise.

But the axis is still visible:

Human / Haman / Khaman / Shaman / Hakhamanesh

All are **Dad-names.**

All name the **same axis.**

5. Pari

The union of **Demon** with **Being** produces, again, a **new son**—the son of the next generation.

His name is **Hor**.

Ontic etymology explains why:

- In Arabic **Hurr** (حر) means **free**
- In Persian, **Free** appears as **Farrah / Feri / Fairy**
- The Greeks, who ruled Egypt for centuries, added their standard suffix **~us** and made **Horus**

Hur is again an ontic name. In Arabic it means **free**. If an etymology is truly ontic, its **phonetic substitutes** must carry **almost the same meaning** across languages. That is a direct test. This is how you check whether an etymology is ontic or fabricated.

Now look at the structure:

- **Iz** is *being*
- The **definite article** is *meaning*
- **Pari / Huri** is “**something-for-another-thing**”

In simple terms: it is **for** in the sense of **belonging** and **possession**. It is **love**.

In Persian:

- **Pur** means **son**
- This is the same root as **Pari**
- **Par** means **feather** → and feather means **flight**

So:

Pari = the one who is for another

The son = the one who is for the father

Love = this relation of “for”

Huri is the Fairy / Pari.

At the same time:

- **Hurriyat / Hürriyet** means **freedom** in Arabic and Turkish
- The English word **free** itself is a derivative of **Fairy / Farrah**
- Persian: **Farrah** (فره)

Now follow the chain:

Fairy → Free → Farrah → Fire

They are from the same axis.

Love is a fire.

This is why Magi **Zoroastrians worshiped fire.**

Later Zoroastrianism kept the fire burning, but **forgot what it meant.**

Divan: The Family of Five

Magic

We are discussing the **3-D space** of the Magi worldview. Since this space belongs to the Magi, it is **Magic**. This is not ideology and not rhetoric. It is **semantic**.

Just as:

- *romantic* is semantically tied to *romance*
- *tragic* is grammatically tied to *tragedy*

So:

Magic is the semantic and grammatical name of the **3-D universe of the Magi**.

A space exists when **three axes** exist.

But these axes are **being**, and being can be **amputated**. That is what the “living” do.

So, in the basic form, the axes are three:

- One **God in the middle: Female**
- One **Dad** on one side ✨
- One **Son** on the other side ✨

Up to here, it looks like a **three-candle chandelier**. ✨

They are **axes**. They are “**the ~ities**” (what are now called *deities*), because:

- “**the**” is **Div**
- *Deities* is linguistically correct, because “**the**” in English is **de** in Latin or Deutsch ✨

Everyone should stay with their own language for depth of cognition. Return to “**this**” or “**the**” in your own tongue to know what is Div called in your language.

For example, in Hebrew you could call them:

Haim = Ha-Im

That is the **family of Demon**.

Why are they named after **Div** and not after **Dad**?

Because “**the**” (De / Des / This) is the **chief of this tribe**. The Magi are **not patrilineal**.

Why It Is Not Three but Five

This ontic family is **not** a clan of three. It has **five members** (for now).

It is true that the “living” amputate the axes of magic. But when **Sun** and **Moon** are amputated, they are **replaced** by a **new Sun** and a **new Moon**.

So the real question is **time**.

They are not a family **at one moment**.

They are a family **across time**.

Therefore, the answer is not:

“They are three.”

The correct answer is:

They are five: Div, Dad, Jinn, Pari, with Iz (always female) in the center.

On the Menorah and the Loss of Meaning

The Jewish **menorah** does not show this structure correctly.

It is a product of **thousands of years of tradition** that developed **blind** to meaning—blind to the **Space of Meaning**.

Meaning is **Amun**, and **he is the chief of this tribe**.

Judaism forgot that:

- **YHWH was female**
- **Israel had horns**

So how do you expect a rabbi to know that **seven is wrong**?

When the **space of meaning** is lost, the **geometry of the gods** collapses with it.

Pyramid

Showing the **Clan of Five** with a **menorah** is not correct.
Showing them with a **square-base pyramid** is exact.

- The **four corners** on the ground are the **four males**
- The **apex** is **female** and **god**

This is the geometry of the magic family that makes the identity of the Ancient Egypt.

Hand

Now put one hand up. Look at your fingers.

- The **thumb** is **God**

The four others are:

- **Ring finger** = **Dad** (crescent moon)
- **Middle finger** = **Pari** (Horus, sun)
- **Pinkie** = **Jinn** (moon)
- **Index finger** = **Div** (sun)

The **hand symbol** is the best way to show the **Clan of Five**, because it can also explain the **Argenegon** (we will come to that). Stay with us.

The hand is not a metaphor. It is a **map**.

Divan (Al)

In Arabic, this sacred family of five is called **Āl**.

Āl is cognate with Turkish **El** = **hand**.

But **Āl** is also **El**, and **El** is **Div**.

As we said: **Div is the head of this family**, and they are all known **by him**. Therefore, all of them are considered “**divs**” as a **family label**.

This is the real meaning of **Divān** in Persian.

Later, this word was **degraded** and misused:

- For poetry books
- For bureaucracy
- For administration (Divān-sālārī)

But **Divān-sālārī** originally means the **political model of Magi rule**:

Divān rules = the Clan of Five rules

Not one king. Not one father. **The family structure rules.**

The Quranic Witness (Even as Adversary)

The Quran, even while opposing this ontology, **still preserves its structure** by repeatedly naming the **reincarnations of Āl** as **groups of five**:

- **Āl-e-Mohammad** = Mohammad, Ali, Fatimah (as God), Hassan, Hussain
- **Āl-e-Emrān** = Emrān, Zakaryā, Mary (as God), Jesus Christ, John the Baptist
- **Āl-e-Dāwūd**
- **Āl-e-Ya‘qūb**

- Āl-e-Ṭahā
- Āl-e-Yāsīn

The pattern is always the same:
A **sacred family**, not a single figure.

But as **Persian Magi**, we do not call these reincarnations Āl.

We call them:

Divān

Turkish or Spanish may call them **El**.

Arabic calls them Āl.

Persian calls them **Divān**.

Different tongues. Same structure. Same five. Same geometry of meaning.

The Myth of Argenegon (Ergenekon)

We are **not** saying this myth is “factually true”.

We bring it here because it **explains the structure**: how the axes fall, how meaning collapses, and how the system **corrects itself anew**.

Today this story is usually introduced as the foundational myth of Turkic nations, under the name **Ergenekon**. That is not wrong, because **Türk is the follower of Tur**, even if they later forgot where they come from. But the word itself is **not Turkish**. It is Persian:

ارگ نگون

Arg-e-Negun = The Fallen Throne

Sadly, this is **our story**.

Argenegon describes, with frightening precision, what happened from beginning to end. Here is the structure in summary:

1. **Ay Nene** (Turkish = *Moon Nanny* = **Inanna**, she is Moon) runs away from home to find a man who can save her **from her parents**.
2. **Gün Dede** (Turkish = *Sun Father*, this is **Div**) is the man who saves her, loves her, and adores her.
3. Inanna's father is **Jupiter** (*Jehu Pater* = Father of **Jahi**). He is a **heretic** (to the Magi). He comes after her, but **Sun kills Jupiter**. His dead body is left in the **6th sky**.
4. Inanna's mother is **Venus**. She cares only about **her own beauty**.
5. **Ay Nene** and **Gün Dede** form the solar system as **Arg / Erg**, meaning **castle** or **throne**. This is the **happy age of Arg**.
6. **Saturn** in the **7th sky** is a friend and keeps the **borders** of the solar system safe. Since he is very far, he is called **"the Stranger."**
7. **Uranus** (this is **Iranus!**) is a cold **female** body outside the frontiers of Arg. She has been trying for ages to find a way **inside** Arg, but Saturn bravely prevents her.
8. Uranus is **Nahs** (نحس), because she has a **spell**: she can **hunt dead bodies** and **raise them**. No one knows this.
9. When Gün Dede kills Jupiter and leaves his corpse in the sixth sky, Uranus finds an opportunity: in a passing, a conjunction, Uranus (Iranus) **enters the dead body** and **raises it**. The myth does not use the word "zombie", but when **Nahs** enters a corpse and it rises, it is called **Manhūs** (منحوس).
10. This time, in a **conjunction** of Jupiter and Sun, the **zombie Jupiter (Manhūs)** beheads **Sun**. Sun never expected this, because he was **dead for a long time**. (This is the moment when our **Div axis is amputated**.)
11. Venus has no problem with her husband being hunted and becoming a zombie. After Sun is dead, they come to their daughter (**Inanna = Moon**), pull her down from the moon to the earth, and **bury her in the underworld**. (This is our **Being** being buried and replaced by the **Living Venus**.)

12. **Ay Nene** is in the underworld, but she still provides **life** on earth through **sweet waters and streams** that she sends to the surface.
13. Thousands of years pass. This long period is called **Arg-e-Negun**, because **Arg has fallen**.
14. But Ay Nene also has a magic: **Time Travel**. She makes a plan. She gets pregnant from **the Stranger**, gives birth to **her own father**, puts the newborn in a basket, and sends him to the surface of the earth through **rising streams**. (We see this pattern in the stories of **Sargon of Akkad** and **Moses**. This is how the **Messiah** is born.)
15. **Dad** now has a very difficult task: he must become **Moon**, and he must **earn it** with his own abilities and talents. He finally rises to the moon and becomes **Moon**.
(The **new axis of meaning** is formed.)
16. Now Dad reaches his hand into the **well** on earth and raises his daughter up to the moon, next to himself. Dad becomes the **crescent**, so that his daughter can be accommodated in the **black part of the moon**.
(The **axis of meaning** reclaims the **axis of being**.)
17. Together, they kill **Jupiter** in a **conjunction** (passing) of Moon and Jupiter.
18. They pull **Venus** down, and Inanna takes her place. She becomes **Anahita** (**Ana-Khoda** = خدای مادر, Mother-God).
19. **Arg** returns to its original form, and the long era of **Arg-e-Negun** ends.
20. Together, they give birth to a **new Sun**.
21. This is why the **Crescent Moon and Star** becomes the **flag of the Magi**.

Final Note

Argenegon is the **founding myth of Israel**, but the Israelites **lost it** while rehearsing the Torah. The Turkic nations kept **parts** of it because they are related to **Tur**—but they too no longer know what it means.

We do **not** use this myth as history.

We use it because it shows, with brutal clarity, **how the structure falls—and how it rebuilds itself.**

Gray Wolf

Back to the **hand**.

1. Put your **ring finger** (Dad) and **middle finger** (Pari) together on the **thumb** (God). Hold the two other fingers (**pinky** and **index** = **Jinn** and **Div**) upright. This shape looks like a **wolf with straight ears**. This shows **Arg after Argenegun is finished**: Dad and Pari are together with God (the girl is at the bottom). In this form, you can **see the Gray Wolf**.
2. Now raise **Dad and Pari**, and put **Div and Jinn** on God, and flip your hand **180 degrees** (girl on top). This is again **Arg**, but this time it is **before Argenegun started**. In this form, you **cannot** see the Gray Wolf.

Both forms are **valid**. Both show **equilibrium** in the **ontic space**. The difference is only **which phase** of the cycle is being shown.

Star of David

The **Star of David** is the simplest geometric way to show what the **Gray Wolf gesture** shows.

In both stable cases, we have **two triangles**. But one triangle is **opposite** the other:

1. In the **upright triangle**, the **apex / God** is on top. This is **Phase One** (before amputation). The two bottom vertices are **Div** and **Jinn**.

2. In the **inverted triangle**, the **apex / God** is at the bottom (this is the **Gray Wolf** phase). The two upper vertices are **Dad** and **Pari**.

Conclusion

It is the **Star of David** that **Iranians have been breaking for 3000 years**.

Axes Reversal: The 3D Ontic Model

Dad is not a prosthesis. He is continuity under reversal.

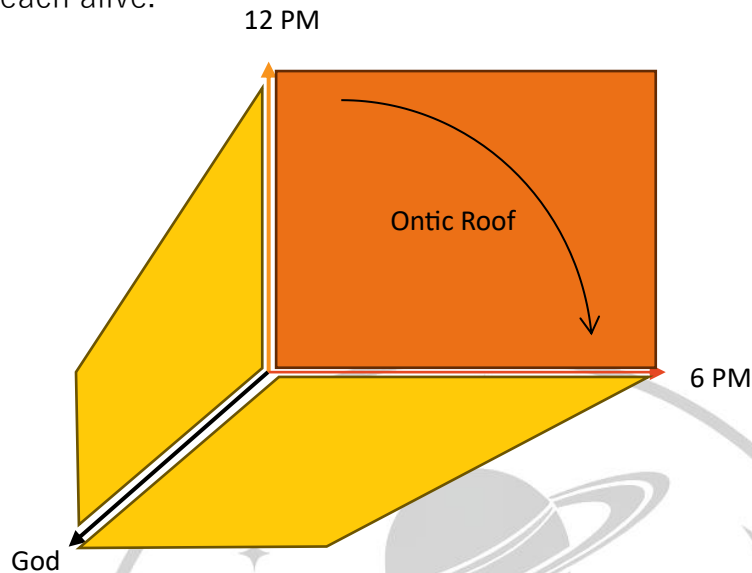

To make this intelligible, we must step out of narrative and into structure. The Magian system is not a mythology of characters; it is a geometry of axes. What looks like genealogy is in fact **ontic kinematics**.

The Original Ontic Space

Imagine a three-dimensional coordinate system, but mapped onto a 24-hour clock:

1. **Div (Sun / Meaning)** — the **Y-axis**, a half-axis rising upward from the center toward **12 PM (noon)**. This is vertical, shining truth, sovereign: meaning as sun.
2. **Jinn (Moon / Love & Flight)** — the **X-axis**, a half-axis extending to the **right**, toward **sunset (6 PM)**. This is motion, desire, flight: love as lunar drift.
3. **Iz (Being / Life)** — the **Z-axis**, a half-axis going **into depth**, away from visibility. Life does not belong to the clock-face; it recedes into existence itself.

This is the **full ontic space**: meaning, love, and being— each as a half-axis, each oriented, each alive.

The Amputation

What historical religion calls “fall,” “loss,” or “exile” is, in Magian terms, **amputation and burial**:

1. The **X-axis (Jinn / Moon / Love)** is **fully amputated**.
2. The **Y-axis (Div / Sun / Meaning)** is **fully amputated**.
3. The **Z-axis (Iz / Being / Life)** is not amputated, but **covered**—buried in depth, veiled, rendered invisible.

At this point, **nothing appears to remain**. The only surviving axis is Z (being), but it points into depth and is concealed. Ontically, being still exists, but **without visibility, without meaning, without love**.

This is the condition myth translates as: *the goddess in the underworld*.

The Role of Veil (Hijab)

And note the historical distortion: the veil was once a device of erotic intensification, its “magic” philosophy being: The highest heat of sex (x axes) is not achieved when easy (Iz = a woman who is not strict) is nude and “phallus” is apparent, but when

1. Easy is covered (but she is easy to sex), and
2. Phallus (the axes of truth and meaning) is apparent.
3. The product (which is love and sex on the X axes) is the highest.

When the upward (apparent) Y axes is amputated, the apparent penis is gone: and covering woman’s body which was devised for “highest sexuality in the space condition” becomes not only useless, but also what buries the woman alive. Therefore, what happens is:

1. Easy is covered (and she is absolutely hard to access (against her ontology)
2. Phallus is amputated (husbands have it, but it dies because sex needs dynamics)
3. The product (love, sex) dies away

We see this situation of Hijab with strict family that closes access mostly in Islamic societies in modern times. Other modern societies sometimes take pride of “not covering the woman under Hijab”, but they are missing the point: Easiness of woman (not as prostitution, which is against our purpose) is restricted by a very strong taboo of the modern society which is “cheating”. Any access out of the dead couple bound is highly rejected by “cheating” stigma which works (in most cases) even better than Islamic Hijab, for non-availability of woman. When society highly values the non-easiness of woman as a virtue, and every female is educated and trained with that virtue and taboo, that is a much complicated and more efficient of “burying the woman”, than the always failing and mostly optional contraption named “Hijab”: Modernity has done a lot better in amputation of the male axes and making female axes unavailable, while “uncovered”.

Woman, both in Islamic covered mode and modern “half naked mode” becomes a device of ontological burial. Being is not erased—this axis is **out of access**.)

The Magic (Magian) Act: The Daughter Gives Birth to the Father

Iz does not wait for rescue. She **acts**.

She performs the most radical operation in Magian logic (which is magic): **temporal reversal**.

She gives birth to her own father.

This is not mythic absurdity; it is an **ontic solution** to the primal paradox: If this new axes of meaning is the father of all of all axes, how can being exist before meaning?

The Magic answer: **by time inversion**.

So a new axis is generated:

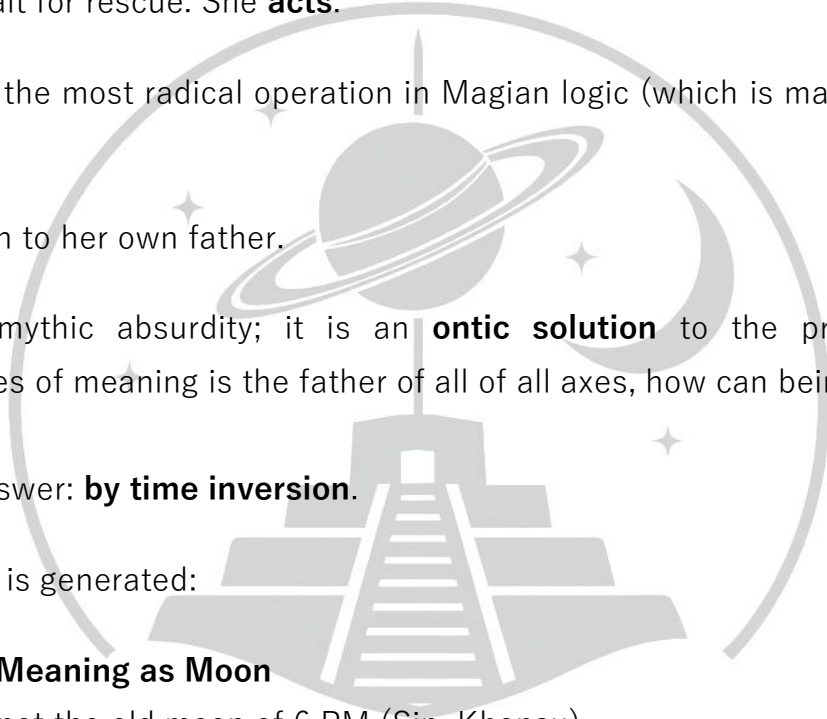

- **Dad = Meaning as Moon**

This is not the old moon of 6 PM (Sin, Khonsu).

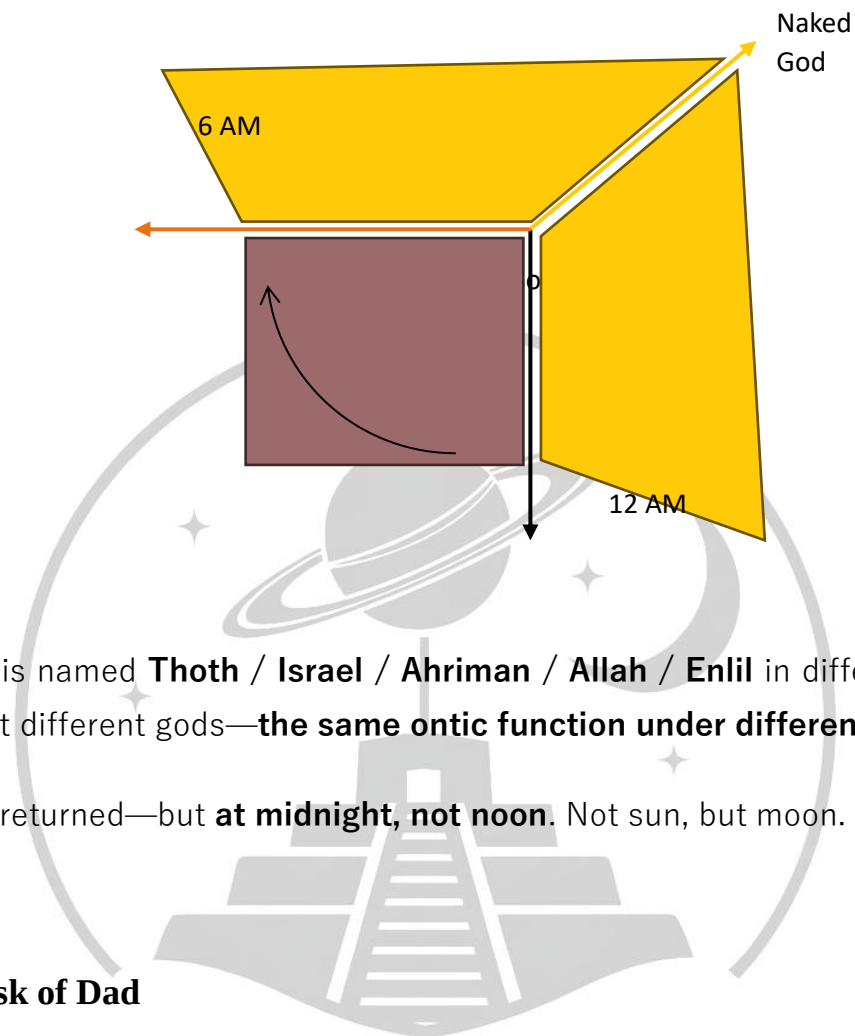

This moon appears at **12 AM (midnight)**.

Structurally:

- The old **Y-axis** (sun / meaning) pointed **upward** to 12 PM.
- The new **Y-axis** (moon / meaning) points **downward** to 12 AM.

Same axis. **Opposite direction. Opposite nature. Continuity through inversion.**

This is the axis named **Thoth / Israel / Ahriman / Allah / Enlil** in different Magian traditions. Not different gods—the **same ontic function under different hijackings**.

Meaning has returned—but **at midnight, not noon**. Not sun, but moon.

The First Task of Dad

The next step is **not** to recreate the sun. That would be a misunderstanding: When man is available and woman is not, how can sex and love be even produced?

Meaning **needs** being before this dynamo works. But being is still buried, still pointing into depth and buried in the grave.

So, the first act of Dad is this:

- The **Z-axis (Iz / Being)** is **not re-created**.
- It is **reversed**.

It now points **upward**, toward **height instead of depth**.

Not born again. **Revealed. Uncovered. Ostensible.**

In sexual-symbolic language: no veil this time: God is naked. This is why Ishtar stands naked.

- This is why Isis has a buried sister in the underworld (Nephthys).
- This is why Inanna has a buried sister in the underworld (Ereshkigal)

Those “sisters” are nothing but **the hidden version of the same axis**.

So now we have a **new ontic plane**:

- **Y-axis (Dad / Meaning)** pointing **downward** to midnight
- **Z-axis (Iz / Being)** pointing **upward** into visibility

Both are continuations of their former selves. **Everything is inverted.**

The Birth of the New Sun

Only now can the horizontal third axis return.

From the interaction of **Meaning (Dad)** and **Being (Iz)**, a new axis is generated:

- The **X-axis** is born again—but this time to the **left**, toward **6 AM (sunrise)**.

This is **Horus / Marduk / Shamash / Utu**.

He is not moon anymore. He is **sunrise at the horizon**.
Yet ontically, he is the **continuation of Khonsu / Sin**—same axis, opposite direction, opposite nature.

Both are: **love and flight.**

Both are sons of **Amun / Osiris/Enlil.**

One dies at sunset. The other is born at sunrise.

This is why Egypt always hinted at a secret relation between **Khonsu and Horus** but could never explain it. The answer is simple in the axial model:

Horus is Khonsu, reversed.

While Khonsu is always depicted as a mummified body (ready to death) with crescent moon on the eastern horizon. Horus is the rising sun in the western horizon, ready for flight.

Among the Indian magi, we see exactly the same structure with: Mithra-Varuna

Mithra is the rising sun, while Varuna is the setting crescent moon. Shiva is Mahadiva (dad), and Shakti is apparent life. The roles of Vishnu and Brahma are equal “meaning as apparent sun” in the first phase, not second.

The Mithraic magi

Now everything suddenly clicks at once about the Persian Magi structure:

- Jahi is the God of depth:
- She gives birth to his father moon/Ahriman.
- Ahriman reverses the axes of being, from Jahi to Anahita (apparent God)
- They combine together to build the rising sun: Mithra

The Ostensible phase is now clear.

But about the axes of the covert era we only know Jahi so far: who was the apparent sun which is necessary for the covert phase?

This question leads us to one of the most interesting answers:

1. You remember that Mazda means “moon demon”, making him a dad, equal to Ahriman.
2. You remember the Majestic naming structure: Ahu-ra-Mazda = A (new) Mazda for Jahi

⇒ Conclusion: Ahuramazda as the apparent sun is offered to Jahi as the replacement of Ahriman who was the axes of meaning in apparent era! It makes Ahuramazda the axes of meaning who is sun, when Jahi is depth.

He became the only god of monotheism, just as Ra or Zar had become the only God in the depth era.

Only one question is left in the Mithraic Magi system: There must be a moon, who is the son of Ahriman, and he is the crescent moon of the depth era. Who is that moon, who is not meaning, but “love and ascend”? Varathraghna: The son of Dragon. And he is a wolf. => Wepwawet and Khonsu are the same: the hour of wolf, Fenrir comes with Ragnarok.

The Buried Sisters

Now the old riddles unlock themselves:

- Isis and **Nephthys**
- Ishtar and **Ereshkigal**
- **Jahi and Anahita**

These are not two goddesses. They are **one axis in two states**: One visible, one buried. One upward, one downward.

The underworld sister is simply the **hidden half** of the same ontic line.

Babylon, Sin, Shamash, and the Political Consequence

Assyriology noticed that **Sin is always dying** and **Shamash is always rising**, but never asked: *what is their ontic relationship?*

Here it is:

- Sin (moon at 6 PM) **dies**
- Inanna gives birth to **Enlil (Dad)**
- From this new meaning-axis, **Shamash/Utu** is born at the horizon

That is why Babylonian kings receive their authority from **Shamash**. He is the **new sun**, born from the restructured ontic space.

And this is why **Nabonidus** was not merely eccentric for worshipping Sin—he was **trying to reverse the reversal**, to collapse the structure back into the dying axis. And this is why **Cyrus** speaks in the language of **Enlil/Marduk**: because once Dad is born, the horizon-sun must rule.

The Star of David

All of this is coded—brutally simply—in the **Star of David**:

- One apex **up**
- One apex **down**
- Left and right for the lateral axes (Div, Jinn, Pari, etc.)

It is not a symbol of Magi or Israelites. It is a **diagram of ontic reversal**.

Three axes die.

Three axes return in opposite directions.

Continuity is preserved. Orientation is inverted.

This is the Magian resurrection.

Corrupt Magic as Cancer

Jesus Christ was not killed because he challenged power. He was killed because he failed the **superstitious test of magic**.

By the time he appeared, the Old Testament had already **trained expectations** toward spectacle: staffs turning into dragons, seas splitting, fire not burning, corpses walking. This had nothing to do with Magic as the Magi understood it. It was already the **absurdized version** of Magic. A theater of impossibilities.

So when Jesus appeared, the Pharisees did not ask: *What structure do you bring? What axis do you realign?*

They asked for **nonsense**. For signs. For shows. For violations of physics recorded in scripture.

He did not perform them. He was executed.

This is only one case that survived in record. The number of reformers who were eliminated by the **same false criterion** and never recorded is unknown.

Muhammad almost lost the same game. In Yathrib, the Judaic tribes demanded: *Bring the Ark of the Covenant if you are not a liar*. That was not a theological question. That was the **same superstitious test**: prove yourself by an object and a spectacle defined by corrupted Magic. He narrowly escaped the political consequences of that demand.

This mechanism is very old.

Take Abraham. Scripture says Nimrod threw him into fire, and fire did not burn him. This single story produced a **perfect alibi** for centuries of religious crime:

If someone is truthful, fire will not burn him.

If he burns and screams, he is a liar and deserves it.

On this basis, half the Magi of the world were burned alive. The test was simple: **burn him**.

If he survives, listen to him.

If he dies, he was lying.

This is not testing truth. This is **murder protected by superstition**.

And this is not history. It is still alive.

In Iran today, there are Mahdist groups whose famous speakers publicly say: “The Shia scripture clarifies that all Imams are fire-proof. If someone claims to be Mahdi, you have a simple test: take a lighter and burn him. No discussion. No reasoning. If he survives, then you may listen to him.”

This is what corruption of Magic means:

It is the **corruption of the testing method**.

It is the **corruption of the laboratory itself**.

In Persian we say:

هرچه بگندد نمکش می‌زنند، وای به روزی که بگندد نمک

(Everything that rots can be salted—woe to the day the salt itself rots.)

That day has already come.

This is why any appearing reformer, any real Magus, is forced first to fight **scripture and priesthood**, not society. But scripture and priesthood are not one person. They are **centuries of accumulation**. The new one stands alone. No matter how strong he is, this fight is structurally unwinnable. He is **bound to fail**.

A paradigm is built on a lie. The job of priesthood is to **add layers** to that lie. Vatican in Rome and Hozeh-ye Elmiyeh in Qom do the same thing: they add text, commentary, rules, expectations—every day. This has been going on for more than a thousand years. The longer it continues, the **heavier** the lie becomes. Flipping this paradigm becomes harder, then practically impossible.

I once saw an old video: a Rabbi meets Benjamin Netanyahu when he was young. The Rabbi asks: “Did you find Mashih?” Netanyahu answers: “We are doing our best. We

will find him soon.” The Rabbi replies: “That is not enough. Only a few hours are left today. Try to find him today.”

This is not hope. This is **urgency to execute**.

Judaism has piled a mountain of conditions on Mashih:

- He must bring back all twelve tribes
- He must bring the Ark of the Covenant
- He must prove lineage from David
- He must fulfill dozens of scriptural signs
- He must pass a long list of priestly exams

Mashih has become a **student** sitting in an exam hall designed by the priesthood.

Publicly, priests say: “We are humble servants of Mashih when he arrives.” In reality, they make Mashih the **humble candidate** who must pass *their* tests.

This system is not waiting for a paradigm changer. It is waiting for someone who will **perfect the same paradigm**.

This is a self-immune disease: the body attacks exactly what it needs to survive.

It is not cancer in the medical sense. But when we say a culture becomes cancerous, we mean this:

The tissue grows harder, thicker, more crusted over time—and **eats the body from inside**.

Look at Iran today. Every year, on the anniversary of Mahdi’s birth (نیمه شعبان), priests climb the pulpits and say: روحی له الفدا — “May my soul be sacrificed for him.” But what do they demand from Mahdi?

They say he must appear only when:

- Dajjal appears with one eye in the middle of his forehead

- A voice from the sky (صبيحه) is heard by everyone on Earth
- He emerges from Kaaba and calls the whole world
- 313 resurrected historical figures stand beside him
- Jesus appears from the Umayyad Mosque in Damascus and joins him
- And dozens of other scripted signs occur

These conditions fill volumes.

So people sit every night and calculate:

“Maybe next year. Maybe when this or that political figure appears. Maybe when this sign matches that narration.”

They are not waiting for Mahdi.

They are **waiting for the script to be satisfied.**

Religion must produce this kind of pathology, because its own survival depends on it.

In this sense, religion is not infected by the cancer.

Religion is the cancer.

Because corrupted Magic is not just a wrong idea.

It is a **machine for killing reformers before they can act.**
